### Medallion Architecture

### Data Enrichment for AI

### Data agents in Fabric

Connect to all your data in Fabric — from databases to real-time streams — and use AI to find answers, generate reports, and automate analysis

A virtual analyst that allows users to interact with enterprise data in OneLake

Chat canvas for creators with new debugging capabilities, making it easier to understand and refine responses

Seamlessly reason over data in OneLake to create a powerful data expert tailored to your data domain

Your data agent can be consumed inside and outside of Fabric, including Azure AI Foundry Agent Service and Copilot Studio
